

## SET-UP INSTRUCTIONS

**It is recommended to use two people when setting up the canopy.**

1. Standing towards your partner, grasp the corner legs and extend out to arms length while stepping back. Insure that bottom truss elbows are free and not overlapping prior to opening.
2. Next, grasp the lower "V" of the truss that you are facing. Lift up the shelter slightly and step back until the unit is halfway open.
3. Place fabric top on frame. Match up the hook and loop on the corners of the cover with the hook and loop at the top of legs. Make sure the center peak of canopy fabric is centered over the peak pole.
4. Pull the frame completely out until all sliders are engaged over the snap buttons at each corner on each leg. You will have to push up on sliders to get buttons to lock in place. You may need to move around unit pulling and opening until completely open and locked.
5. With a helper, one should go to opposite legs on one side of the canopy and extend the legs by turning the leg release button and pulling out the lower leg. Use your foot on button of leg to start the extension, then use your hands. This will allow the leg to extend smoothly. Repeat this step on the other side.
6. Adjust the legs to the desired setting by turning the release buttons and pull out lower part of the leg raising canopy. You may have to turn button to get it to snap back in place.
7. Use the large nail stakes to secure the feet at each leg position.
