

## Crocodile Trading Canopy Care Guide (Evo-Shade 40 and Evo-Shade 50 Gazebo)

Thank you for purchasing your new **Easy-Up Evo-Shade Gazebo**. Your Evo-Shade Gazebo will cater for all outdoor events which will bring you years of enjoyment providing you follow these instructions efficiently and take care of your Evo Shade Gazebo correctly. Please ensure the instructions are fully understood before attempting to erect your Gazebo and keep them stored in a safe place for future assemblies.

Crocodile Trading **highly recommends** that your Evo Shade Gazebo is insured against theft, adverse weather conditions and accidental damage through incorrect assembly and improper storage. Crocodile Trading Ltd is **NOT** responsible for these occurrences.

Please ensure that you check the box(es) before using your Evo Shade Gazebo as we recommend that you check that **all components** have arrived within the packaging. Before your first event / use, we suggest familiarizing yourself with the assembly / disassembly of the Gazebo. Despite the Gazebo being a perfect shelter against the elements, there are certain **extremes of weather** for which allowances should be made.

The Evo Shade Gazebo is **weatherproof** to a very high standard. However, during extreme conditions the Gazebo may show evidence of minor water ingress along the seams. Treating the seams with a **seam sealer** can prevent this over a prolonged period of time.

The Gazebo should be assembled on a **level** surface and please ensure that you have enough help to lift and carry the Evo Shade without straining yourself or the frame. To erect our Evo Shade Gazebos we suggest the following to comply with guidance and safety:

3m x 3m = 2 people

3m x 4.5m = 3 People

3m x 6m = 3 People

### **Basic Assembly Instructions**

1. Take the framework and canopy from the carriage bag
2. Stand upright and then pull out each corner until the Easy-Up Gazebo is approx 80% assembled
3. Lay the roof canopy over the frame
4. Now fully open the cross member framework and secure the canopy in place over the corners of the structure
5. Extend the legs on each corner to the desired height

We cannot stress enough the importance of taking care of your Evo Shade Gazebo during adverse weather conditions. It could be necessary to tie down the Evo Shade Gazebo during the assembly. We **DO NOT** recommend that our Gazebos are left up over night or un-supervised – these structures are easy to disassemble within a few minutes. The Evo Shade Gazebo should be stored in a dry, cool place ready to be used the following day / event.

### **Fire Precautions**

Your Pop-Up Evo Shade Gazebo can burn. Follow the common sense steps below:

- When assembling, ensure there is an approximate distance of 6 metres between tents
- Do not place cooking, heating or lighting appliances / equipment near the sides or roof
- Always observe safety instructions for all appliances / equipment
- Keep exits clear – **DO NOT OBSTRUCT**

It is imperative that **great care** is taken during windy conditions and ensure that you have enough help to prevent any strain on the framework. All parts must be dried at the earliest opportunity. The material and frame must not be stored wet. The Evo Shade Gazebo is **NOT** covered under warranty if damage occurs due to incorrect erection / dismantling / packing or storage.

Should you damage or lose any parts of the Evo Shade Gazebos, spares are available direct from Crocodile Trading Ltd, either enquire using the **Customer Service** form or contact a member of our team on **0844 800 9830**.

**Please Note and Please FULLY Understand:** Storm and Adverse Weather damage, accidental damage and damage through improper erection, dismantling and packing / storage is **NOT** covered by Crocodile Trading Ltd's warranty.
